## BIO

Tara Gayle is a landscape designer with a focus on resilient ecological design, blending artistry with deep ecological awareness. Her education has taken her across the country and the world, studying permaculture design and regenerative agricultural systems in a variety of cultural and climatic contexts.

At the heart of her work is a commitment to helping people see and shape their environments holistically—reconnecting with the land through design that is both timeless and deeply rooted in place. Tara draws on traditional wisdom and ecological principles to guide her projects, encouraging a return to our sacred relationship with nature. Whether working in residential landscapes or broader community spaces, she designs with the intention of creating lasting beauty, function, and ecological balance.

## SCOPE

Tara has owned and operated her own landscape maintenance and design company for over a decade, working closely with clients to transform both residential and community spaces into thriving, ecologically rich environments. Her practical experience in the field has been a foundation for her deeper exploration into regenerative and resilient landscape systems.

In the past year, she expanded her work by acquiring a local plant nursery, now entering its second season. The nursery is steadily transitioning toward a focus on native plant cultivation and organic vegetable production, supporting biodiversity and healthy soil systems. Through this hands-on work, Tara continues to promote sustainable growing practices while making ecologically responsible plant choices more accessible to her local community.

## APPROACH

- Initial consultation
- Design Proposal
- Site Analysis
- Landscape Plan
- Planting Plan
- Final Design
- Build & Install
